

Specialist Designed For Cloud Stand Alone Legal Accounting System

Klyant is designed to harness every benefit the cloud offers for law firms.

The only way this can be done is by using next gen technology to solve the problems law firms face.

Trust & Office Money Managed In One System

Given the management of trust money is so heavily regulated, it only makes sense that trust money should be managed to the same standard as firm money in the same accounting system. Any other way is bound to lead to errors and inefficiency.

ABA Rules Compliance

As Klyant is a specialist legal accounting system regulatory compliance is made simple. Warnings are provided if a user tries to overdraw the trust account and all the reports you will need for regulatory audits are available.

Disbursement/Expense Management

Users can account for expenses out of the office and trust account correctly and with ease. Linking expenses to the purchase ledger is very straightforward.

Expert Support

Telephone support is provided by specialist legal bookkeepers meaning that users always have somebody who has heard their question and knows the answer on the end of the phone.

DESIGNED FOR CLOUD SYSTEM

Next Gen Tech
Easy to use
Accessible on all devices

All matter transactions on one Report

BANK RECONCILIATION

Straightforward and easy to use

PRESS RELEASE

Thursday, 14th February 2019

Irish cloud based legal accounting application launches in the North American market at the ABA Techshow in Chicago

Klyant Legal Accounting Software will launch its next generation cloud based accounting software for law firms in the North American market at the ABA Techshow which is taking place between **27th February and 1st March 2019 at the Hyatt Regency Chicago, 151 E Wacker Drive, Chicago, IL 60601, USA**

The system delivers a solution to the requirement to manage trust funds in accordance with the relevant ABA Rules and at the same time accounts for operating funds in one application. Many law firms either manage trust funds in a different system to their own firm accounts or manipulate general business systems such as Quickbooks to try to efficiently manage their client's trust funds. Klyant provides the features expected of modern day accounting systems in a cloud based application actually designed for law firms.

- Klyant was launched in May 2016. Prior to launching Klyant the company provided desktop accounting technologies to the legal industry.
- Klyant is the market leading provider of accounting technology to the legal industry in Ireland
- The company entered the UK market in 2017 with an office in Manchester, England
- Klyant has a deep integration with Clio practice management software

Commenting in advance of the company's North American launch, John Gilmartin, CEO, said "It has been a big goal of the company to launch in North America and we are all very excited about this step in our growth plans. We know that Klyant can deliver huge time savings to law firms currently struggling with inefficient accounting systems that were not designed for the specific problems faced by the legal industry. Our customers demand the benefits accounting technology can now provide and our focus is on delivering these to them".
