

NATIONAL SOCIETY FOR LEGAL TECHNOLOGY Mission Statement

The National Society for Legal Technology (NSLT) empowers working professionals and prepares students for the technology challenges of tomorrow. NSLT provides cutting-edge information on the latest legal technology and services that enhance a legal education and gives students an edge in today's competitive job market.

Whether it is for a paralegal, law student or lawyer, an NSLT membership delivers information on hundreds of legal software programs and tutorials with the click of a mouse – allowing professionals to boost efficiency and ultimately provide clients with the highest quality service. The NSLT Legal Technology Certificate program is used as classroom curriculum in Law Office Technology classes at over 125 Colleges and Universities in their Paralegal Programs and Law Schools.

Douglas Lusk, J.D. is the Founder and CEO of National Society for Legal Technology (NSLT). He received his Juris Doctorate in May 2018 from the University of La Verne, College of Law, in Ontario, California.

As Founder of the NSLT, Doug's goal is to bring awareness to the need for ongoing legal technology education in the legal industry as a whole, while also working to connect students and professionals with legal technology educational resources. In recognition of the NSLT's new Legal Technology Certification program, the NSLT was nominated in November 2016 for an Innovation in Legal Technology Education award at Abovethelaw.com.

Doug served in 2016 as Committee Chairman of the Legal Technology Committee of the Ready for Practice Section of the American Bar Association Law Student Division (try and fit that on a business card!). As chairman, Doug worked with the Ready for Practice Section Committee to develop best practice recommendations and informational seminars for the ABA to promote legal technology education as part of the law school curriculum.

He is a nationally recognized expert in the field of legal technology education and has been a guest speaker at various bar association conferences across the nation. His article, "What is missing when it comes to legal technology?" was published in *USA Today* in March 2018. Today, the NSLT's Legal Technology Certificate is used as curriculum in 125 universities as the required textbook to teach paralegal and law students how to use legal software programs.

Besides being involved in legal technology, Doug is passionate about religious freedom and currently serves internationally on the Committee for Diversity for the J. Reuben Clark Law Society. He is an adjunct professor teaching Law Office Technology at Fullerton College, Mt. San Antonio Community College, and Salt Lake Community College. Doug resides in Studio City, California with his fiancé, Peter, and their 12-year old son, Jared.
