Our Story

dealcloser™ was founded in Edmonton, Canada in 2017, by Amir Reshef and Ashvin Singh. dealcloser is a transaction management hub for legal professionals that brings lawyers and their clients together on a deal, transforming and modernizing the deal process. Client relationships are at the core of any law firm and even small transactions require significant client interaction. Whether you have one or many deals on the go, use dealcloser to ensure that each client feels like they're your top priority.

Since launching our legal transaction management software in June 2017, we've partnered with a variety of organizations, including Above the Law's Evolve the Law platform, as well as integrated with key organizations, such as Clio, significantly increasing value for our users. Our team has grown to 8 talented individuals supporting an ever-growing number of law firms across North America.

Our Founders

Amir Reshef, CEO

Amir Reshef is a former corporate lawyer with 5 years of experience working in corporate law, and 3 years at a large international law firm. [\(Photo\)](#)

Mike O'Connor, CTO

Mike designs and builds technologies that perform at the highest standards of security, reliability and performance. [\(Photo\)](#)

Teruel Carrasco, CRO

Teruel's expertise in sales has allowed him to successfully grow startup companies and take those companies into international markets, including the US, South America and the EU. [\(Photo\)](#)

Our Product

dealcloser is an online platform designed for corporate lawyers that makes the transaction process more efficient and accurate, automating or eliminating many of the non-value-added administrative tasks required to keep a deal running smoothly.
